

# RadEx Ltd.

## Introduction

The first teleradiology service company in Taiwan

RadEx Ltd., which started up in 2007, is the first teleradiology company in Taiwan, Republic of China. We provide teleradiology solutions to the clinics and hospitals. We also apply network, software and hardware PACS integration for our clients. We want to take our location and culture advantages to delivery our convenient, quick, professional and diversified teleradiology services to the great China market. In the future, teleradiology is probably the best way to speed up the improvement of healthcare system in Taiwan as well as mainland China. According to our effort, we are now reading the medical images not only from the urban areas but also the rural areas at where the healthcare resource is a lack.

Our diversified services:

- Teleradiology films reading for the clinics or hospitals.
- Teleradiology films reading for the physical examination centers of citizens.
- Teleradiology films reading for the physical examination centers of foreign labors.
- Teleradiology films reading for 2<sup>nd</sup> opinion and teleconsultation.
- IntegradTele-PACS including films reading, credentialed and licensed radiologists, and back-up (short-term) storage of imaging data.
- IntegradTele-PACS including films reading, credentialed and licensed radiologists, back-up (short-term) storage of imaging data, PACS investment.
- IntegradTele-PACS including films reading, credentialed and licensed radiologists, back-up (short-term) storage of imaging data, PACS and CR investment.

Great China area is one of our potential markets. The goal of our company is providing the number one teleradiology service for the Chinese people in the world. We continually learn the up-to-date news and technology of teleradiology from USA and European. We keep on going to explore the teleradiology market in Taiwan. Here is our research base. More workload of medical imaging in the foreseeable future, more teleradiology services will be needed to solve the problem of radiologist shortage. Besides, we offer the "2<sup>nd</sup> opinion" service for people who are searching for the subspecialist or medical imaging experts to read their prior examinations, such as CT or MRI. He or she will get our Doctors' comment in merely few days.

RadEx business is highly flexible. We believe that the other competitive advantage of our company is IntegradTele-PACS program including: quick response to the requests of reporting, high quality and final imaging reports between 20 minutes and 72 hours, timely radiologists' consultation, radiologists' licenses and credential, emergency and mobile radiologists' supporting services, and quality assurance activities.

RadEx, the leading teleradiology provider in Taiwan, is expecting you to join us soon. We will already have satisfied your needs now and ever.
